

Simons retail store

Simons is a Canadian retail brand who values the highest level of creativity in its product assortment, design and art partnerships. Simons store designs are unique, approachable and customer-focused. The overarching design language for the 100,000 square foot Vancouver, BC store plays with streamlined geometry, bursts of color and raw architectural forms, then is fine tuned into a distinct solution to differentiate every department. Marmoleum and Flotex flooring were selected for their ability to withstand huge traffic volume, ease of maintenance and for their great color palettes. The ability to customize with Aquajet cutting delivered an end result in the “Twik” department that was bold and dynamic – just like the young women shopping there!
