

SkiStar Hundfjället

SkiStar's facility in Hundfjället offers restaurants, lounge bar, playroom, shop and relaxation area with sauna and gym. Offering a well-kept and clean environment for guests is a crucial success factor. Season out and season in, thousands of ski boots rub against the floors in SkiStar's indoor environments. Nevertheless, they manage to create a fresh, relaxed and pleasant environment. - The advantage of the Flotex carpets we have installed is that they are very resistant to ski boots, and above all to moisture. You can even spill beer on them and then just vacuum them up with a wet vacuum cleaner, says Stefan Anderson, destination development, SkiStar AB. In addition to cleanability, there are other parameters that are crucial for the daily experience. Many who visit SkiStars Lodge want a relaxing atmosphere. - We have guests who have noticed that we have a very nice and fresh indoor environment, and we have also received questions about which floor we chose, says Lena Backlund, Hotel Manager SkiStar Lodge.

Lieu SkiStar Hundfjället, Sälen, Sweden
