

St Joseph Primary School

St Joseph's Primary School Taree refurbished their existing library to provide a multipurpose space with learning support and a breakout area. To help create a comfortable and inspiring learning environment, Forbo's Flotex was used as the main flooring finish, the combination of colours and unique curved shapes spark curiosity, and inspire thoughts and movements amongst the students. Flotex is asthma and allergy-friendly certified flooring with an impervious washable backing for extra hygiene. Additionally, Flotex has an acoustic backing with 21 dB sound reduction to ensure students can concentrate and avoid distractions. Flotex is truly superior in terms of wear resistance and cleanability, making it the ideal flooring solution for learning spaces.
