

St John Apostle Primary School

St John's Apostle Primary School design enables students to instantaneously access the resources they need to support, enable and engage them in their learning. It acknowledges that learning can occur anywhere and at anytime and therefore provides conditions where learning opportunities can be varied and purposeful without compromising student safety. Flotex Flocked Flooring was chosen for the school's indoor basketball court, because of its unique construction, it is a textile floor that performs like a resilient. Making it the perfect choice for this application The surface pile is made up of up to 80 million 2mm fibres per square metre, making it extremely dense and therefore very well suited to high traffic areas - coping especially well with busy exercise classes and gym facilities. Flotex has 100% impermeable backing, making it waterproof and a truly washable floorcovering, and not to mention Flotex is also slip-resistant in both wet and dry to ensure the safety of students. The Basketball court outlines on the floor were hand-cut and installed via the highly skilled Flotex installers from Trump floorcoverings Melbourne.
