

Stadium and official TFC shop

Toulouse Football Club (TFC) has decided to renovate the flooring in several of its facilities. They opted for a flooring with unique acoustic qualities, specially designed for TFC in Flotex Lab. Flotex in the Football Club colours has been installed in the central sports aisle, the reception hall and the press room at the football stadium. The official TFC shop has also been given a facelift, with the boundaries of a football pitch added to the room's design and immersive feel. This customization is the result of a concept that enables all types of decor to be created on flocked textile, guaranteeing a made-to-measure response to your needs.
