

Stephen Lawrence Centre

Forbo Flooring Systems’ versatile floor coverings have played a significant role in the reimagination of Your Space, a mindful co-working environment housed within the Stephen Lawrence Centre in Deptford, South London. Home to the Stephen Lawrence Charitable Trust (SLCT), the centre has been running for over 10 years and the latest refit builds on its wider goal to support people from under-represented backgrounds to become architects. In the largest pro-bono project of its kind, design firm Gensler, fit-out specialists BW: Workplace Experts and branding agency LBA, worked together to deliver Your Space, opening up the area to create a feeling of networking, collaboration and flexibility. Forbo’s Sarlon Uni Apricot acoustic vinyl was used on each of the floors, in corridors, staircases and working areas. The seamless flows of orange spread from the ceilings, down the walls and finally onto the floors, connecting the different spaces together and bringing them to life. Sarlon offers a truly unique flooring solution combining high acoustic performance with optimal resistance to indentation, ideal for high traffic areas.
