

Suncorp Office Fitout

Wei Shun Lee, Interior Design Manager of Cox Rayner Architects: The Suncorp fitout was differentiated from more conventional corporate fitouts by its focus upon sustainable materials that reinforce Suncorp's corporate ethos, reduces institutional character and acts as a forerunner of a new typology for the workplace. The Forbo products were selected as their properties were in line with our design mantra and would allow the design team to use the products to enhance the new workplace.

Location	Brisbane, Australia
