

## Sustainable Nuway Bamboo

As part of the refurbishment of a high-end office building in Teddington, Nuway Tuftiguard with Bamboo scraper bars was expertly fitted in the entrance way by SDS Matting Limited's team. The Bamboo scraper bars worked perfectly with the colour scheme throughout the new reception area, ensuring an outstanding first line of protection against moisture and soil whilst complementing the interior finishes. Recognised for its strength, durability and structural integrity, Nuway Tuftiguard Bamboo delivers superb performance and appearance retention in the highest traffic areas – such as busy offices. The addition of Bamboo to the design, a sustainable species of grass, makes it the sustainable entrance flooring product of choice.
