

Synthon Nijmegen

Synthon is an international, science-centered pharmaceutical company specialized in developing and manufacturing high-quality generic and innovative medicines for patients around the world. Forbo Colorex flooring is chosen for its advanced technical flooring system specifically designed to control static discharge in sensitive areas. The Colorex inner and outer corners are preformed by Forbo and strengthened to ensure the best possible result. Due to a pre-formed angle, there is no need to weld at the most sensitive points, but only at the base where it forms a 100% hygienic and stable connection.
