

Tübinger Stuhl 2.0, Pozsgai Möbelschreinerei, Heitersheim

The Tübingen Chair 2.0 is a reinterpretation of the original Tübingen Chair, which was manufactured by the Schäfer company in Tübingen until 1973. The design by master carpenter Raphael Pozsgai is contemporary, clear and fresh. The characteristics of the prototype have been retained: High stability, very good seating comfort, excellent craftsmanship and the unique shape. In the special mention category, the TS2 recently won the "focus open" design award from the state of Baden-Württemberg. The chair is offered in oak and ash in combination with furniture linoleum. The furniture linoleum used is available in 21 colors, giving the user a wide range of customization options. Plain, in two or more colors combined, the TS2 is a real eye-catcher. The detail of the chair legs in contrast to the linoleum makes the chair an eye-catcher.
