

Technical School Leiden (LiS)

LiS is a secondary technical school in precision engineering. The school was founded in 1901 by Nobel laureate Kamerlingh Onnes. When he received the Nobel Prize in 1913, he stated that he would never have succeeded without the instrument makers from the Leiden School. They devise, design and make instruments on behalf of science (think of the CERN particle accelerator at Geneva) but also of the business community, such as ASML and Philips. Internationally, the school is also very well-known. The Dutch King Willem-Alexander has opened a new wing in 2016 where our beautiful Allura Color fits perfectly.

Projekta nosaukums	Leidse instrumentmakers School (LiS)
Adrese	Bio Science Park Leiden
Arhitekts	Kentie en Partners Architecten Halfweg
Interjers	GlobalFacilities Petra van Oosterhout
Pasūtītājs	GlobalFacilities
Datums	juli 2016
