

## Terveystalo Headquarter

Interior architect Robin Wycherlay; "We specified Allura flex and seagrass for our Terveystalo project because they offered high quality combined with the latest trend. The colour scheme of the carpet allowed us to create the natural mood we were looking for, with seamless connection to the oak of the flooring. Installation was straight forward, and the exceptional value made it easy for our customer to support our decision. We are delighted with the result, as is our customer."
