

**The Forum Shopping Center**

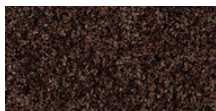

In the heart of the Courchevel resort, the 2 544 m<sup>2</sup> Le Forum shopping mall has been renovated. This central hub, which houses local shops, restaurants, and sports facilities, needed to combine resistance to extreme winter conditions, a mountain aesthetic, and visitor comfort. Flotex was installed in the central hall, complemented by a full range of entrance mats. Flotex is ideally suited to the demands of a public space exposed to Alpine winter conditions: slush, heavy traffic from ski boots, and easy daily maintenance. At the entrances, the Coral brush and Nuway mats serve a dual purpose of scraping and absorbing dirt, while remaining accessible to people with reduced mobility.
