

The Hospital of the Institute of Mother's Health Center

The Hospital of the Institute of Mother's Health Center is located in Łódź, Poland. It consists of two large hospital pavilions and technical buildings, kitchens, administration buildings, a hotel, etc. Forbo flooring solutions have been installed on a total area of approximately 3006 m²: Marmoleum flooring in the corridors and hospital rooms, Flotex flooring in the waiting rooms and children's playrooms, Safestep Aqua vinyl flooring in wet areas and Colorex in the treatment rooms and server rooms. The Marmoleum floors feature arrows that clearly indicate the direction of the three main areas in the emergency department: resuscitation and treatment, consultation and direct therapy. The Coral entrance mats at the entrance to the building effectively protect against dirt and moisture brought in by visitors.
