

The Montaigu Community Center

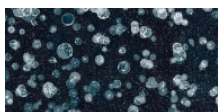

The Montaigu Community Center, headquarters of the Terres de Montaigu metropolitan area which houses the local government's administrative offices and public reception areas has undergone an interior renovation that combines modernity with user comfort. Designed by the firm Archi Urba Déco, this project utilized Flotex vision and Flotex natural flooring, selected for their ability to combine refined aesthetics with technical performance suited to a facility open to the public. Thanks to high-definition digital printing, Flotex vision made it possible to feature a variety of graphic and floral designs throughout the different spaces, while Flotex natural provided the warm, authentic look of hardwood flooring, all while maintaining the acoustic comfort and durability of a flocked textile floor. In total, more than 3 200 m² of flooring was installed to bring this project to life.

Project name	Hôtel communautaire de Montaigu
Building Contractor	Anne-Lise BATARD
Architect	Marie-Christine JUSKO - Archi Urba Déco
