

The Pałuki Cooperative Bank

The Pałuki Cooperative Bank in Żnin got a modernization which included a customer service room, office rooms and social facilities. The decision about modernization was taken with a view on increasing customer comfort and quality of service, as well as upgrading the aesthetics of the bank's main branch. The new interior design refers to the agricultural history of the Pałuki Cooperative Bank. Forbo Marmoleum flooring was chosen for the Customer Service Room floor, with embedded signs indicating the direction of circulation. Forbo Flotex flooring was applied in the leisure area.
