

The Edge, Amsterdam

Situated in Amsterdam, The Edge is considered to be the world's most innovative and sustainable building. Officially opened in May 2015, the building showcases an array of digital and sustainable innovations, many of them "world's first" and includes among its tenants leading companies such as Deloitte. The natural choice for flooring such an exemplary project fell to Forbo's Marmoleum Walton, a naturally sustainable material with 97% natural raw materials, 72% of which are renewable and which boasts a 43% recycled content.
