

The Refinery Student Accommodation

For The Refinery, a new build student accommodation complex in Leeds, Jasper Sanders + Partners looked to create a fresh and contemporary interior design scheme that underpinned the site's historic significance. With a variety of activity zones, Forbo Flooring Systems' Tessera Cloudscape carpet tiles and Sarlon acoustic sheet vinyl were specified, helping to create a fully integrated and striking space that meets the demands of modern student living. The Refinery was a winning project in the Fly Forbo 2020/21 competition. Built on a former industrial site near Leeds City Centre, The Refinery is a 397-room student accommodation complex providing high quality apartments, shared living spaces and a whole host of amenities. Developed by Gregory Property Group and operated by Fresh Student Living, the interior of The Refinery was designed by Jasper Sanders + Partners (JS+P), who worked alongside AHR Architects and GMI Construction to deliver this market leading student accommodation project for specialist investor client, Curlew Capital.
