

Tradium Toolbox

ToolBox is a multi-functioning house that allows for all kinds of sports and noise in workshops and sports halls. "For the owner it was generally important that the floors were easy to clean and maintain in an environment where it is exposed to a lot of wear and tear. Since the floor was to be used in a school, it was important to us that the floor was durable - Sphera Element has a great performance which makes the floor practical. At the same time, we needed a floor in a neutral and homogeneous colour palette, which focuses on the raw and rustic surroundings. Moreover, it is always a plus in our book when the production of the material is environmentally conscious! The linoleum floor was used in the teaching rooms due to its noise reduction properties and wear resistance. In addition, it was important that the floor pattern was discreet and able to camouflage any scratches."
