

Triple Point

Forbo's Marmoleum Solid was the floor choice for a creative breakout space at investment managers Triple Point. With its growing headcount, the firm appointed AW Spaces to create an environment for Triple Point's hybrid working strategy, whilst developing a light and warm aesthetic. Founded in 2004, Triple Point employs 215 people and manages five distinct investment strategies: Social Housing, Energy, Digital Infrastructure, Private Credit and Venture. Each strategy helps to solve a problem faced by society, and each creates opportunities for investors.

Location	Edinburgh, UK
