

**UCL East Campus - Nuway Grid Black Anodised**

Opened in September 2022, the UCL East Campus in Stratford, London, includes apartments for over 500 students, cafes, a shop, a cinema and public art installations. This means that the campus can expect thousands of students and visitors to walk through their entrances each day, so the installation of an effective entrance flooring system was essential. Launched in the summer of 2022, Nuway Grid Black Anodised offers a stylish but contemporary alternative to Nuway Tuftiguard Black Anodised. Offering a modern aesthetic along with a 7-year warranty (as it was installed by Master Matting, a FESSI Contractor), Nuway Grid Black Anodised is the perfect product for this Campus as it can withstand heavy foot and wheeled traffic and help to reduce slips, trips and falls within the building by removing brought in dirt and moistures.

Location	Stratford, London
