

Universal Music Studio Poland

The idea of balance between elegance, austerity and warmth of the materials used. The space of the UMP office was supposed to be consistent with other Universal headquarters around the world. It was supposed to reflect the relaxed entertainment atmosphere and at the same time emphasise the full professionalism and modernity of Universal Music Polska. At the same time, the office had to be adapted to the employees, their needs, and also support their daily work. Hence, the space is elegant, maintained in dark colors that give a specific character. It is both inspiring, stimulates creativity and exudes a homey vibe. All this is to make the employees and visitors to the plant feel safe and at home. Natural, ecological and environmentally friendly materials from Polish suppliers were used in the project.
