

**University of Oulu**

The auditorium of the University of Oulu, Finland, is created to have a multi-purpose use for lectures and meetings. Also there are many "round" tables for students to work in teams. As floor covering the architect chose Forbo Tessera Basis carpet tiles especially because of its acoustic properties. It prevents noise from steps, moving furniture and absorbs sound that comes from speaking etc. The dark color 351 jet was chosen because of the cinema feeling.
