

Vacation apartment Usedom

Welcome to the vacation paradise Quartier am Strand in Heringsdorf on Usedom! Usedom is one of the most popular German vacation destinations on the Baltic Sea islands, known for its wide sandy beaches, historic seaside resorts and wild, romantic nature. Quartier am Strand - Apartment 11 is 87 square meters in size, has three rooms and is located on the first floor of a charming residential complex. The heart of the apartment is the open living area with a wood-burning stove, which creates a cozy atmosphere with crackling flames. The modern and comfortable furnishings allow for a relaxing stay and offer an unforgettable vacation experience after an East Frisian island excursion. The entire apartment has been furnished in light and natural colors. The classic Marmoleum Walton linoleum in the color rosemary green blends in perfectly with the furnishings and brings the nature of the island into the rooms. The natural flooring is particularly easy to care for and durable, making it particularly suitable for vacation homes. The linoleum flooring is also very robust: thanks to the Topshield Pro surface coating applied by Forbo at the factory, it is permanently resistant to the walking around of many visitors with beach sand under their shoes or the dragging of heavy suitcases with vacation luggage.
