

Vestskoven Gymnasium

The staircase in the newly built upper secondary school in Albertslund makes a unique impression with its red Marmoleum Piano colour. The colour combination underlines the staircase's function as a gathering point and as a 'highway' for the daily traffic of the 800 students. The staircase covered in the calm, saturated grey Marmoleum Piano colour works as a "learning staircase" for the students. They sit on it while being educated.

Adrese	Albertslund, Denmark
