

VieCuri Medical Center Venlo

In 24 November 2015, the completely renovated Children's Department in the VieCuri Medical Center Venlo was opened. Fresh blue hues, a modern interior and a cozy look that reminds you of a hospital as little as possible: that typifies the new nursing ward and outpatient clinic of VieCuri in Venlo. The theme in the new children's department and the adjacent children's clinic is "the world under the sea". The underwater theme is a link to the location of VieCuri in Venlo, which is located right next to the Maas river.

Reference Architect a/d amstel architecten, Amsterdam
