

Villa Vie elderly center Solingen

"Living well - receiving qualified care" is the motto of the newly built Villa Vie senior center in Solingen. Since May 2019, the Protestant facility has been providing seniors with a modern living environment with a feel-good atmosphere. In the course of the modernization, the Großkemmerich architects tailored the room and color design to the needs of the elderly and demented residents. The combination of wooden wall elements, natural-colored furniture and the versatile floor design creates a harmonious as well as stimulating overall picture. An eye-catching feature of the floors are the inlays that were used in the common rooms. Marmoleum Cocoa from Forbo was installed in warm and earthy tones and also has an extraordinary feel. This flooring literally invites you to combine different shapes and colors. But Marmoleum not only offers visual advantages, it also scores with technical properties such as easy and efficient cleaning, durability as well as resistance to the traces of everyday use in Villa Vie.

Date of completion Mai 2019
