

Vytautas Mineral Spa

Vytautas Mineral Spa is a celebrated mineral spring facility in the Baltic region. Guests can improve their wellbeing throughout their stay, thanks to the health-giving minerals of the Sofia source. The floor designs from the Flotex Organic collection are inspired by nature, they reflect the shapes we find in the natural world. Organic shapes are currently a major interior trend. The liquid shapes are not regulated by any pattern or exact dimensions in their curves, angles or lines. Forbo's high definition printing technology offers organic shapes and motifs delivering unique contemporary all-over patterns that contribute to more engaging and healthier interior spaces.
