

Webhelp North Macedonia

A team has been working hard to transform a space into a beautiful, modern office. Webhelp is a multinational company for technical support, customer care, outsourcing and business consultation in Skopje. The offices, located in the city centre, are wholly renovated and aptly equipped. Forbo's Tessera Layout & Outline carpet tiles were installed by our specialists with advice from architectural studio Tetraktis. The chosen colours are recognizable to the public, and the 750 m2 of Tessera carpet tile flooring will contribute to quiet working hours, which can be crucial to companies where global customer care is constantly provided.
