

Western Sydney University Bankstown

*<i>*2023 Sustainable/Innovation Development Award Winner – Urban Taskforce Australia</i> This vertical campus for Western Sydney University sets a benchmark in sustainable design, earning a prestigious 6-Star Green Star rating. Designed with innovation at its core, the building features rainwater capture, advanced thermal and lighting systems, and solar power integration. To support these environmental goals, Forbo’s Marmoleum flooring was chosen for its leading sustainability credentials, combining eco-performance with visual appeal. With a wide selection of organic patterns and colours, the product helped bring each learning space to life while meeting functional and environmental standards. Marmoleum is a long-standing, reliable choice for educational buildings—valued for its quality, durability, and environmental certifications.
