

Wooden Eco house

Beautiful wooden eco home on the edge of Den Bosch. For a new start together the residents wanted a new interior. Their wish was an interior with a warm, modern look with comfort. With special attention to acoustics and sustainability. Heidi Willems, interior stylist and owner of PURE Styling immediately thought of Marmoleum and presented the cocoa earl grey chocolate. The residents were very enthusiastic about the design and the floor. The floor is laid seamlessly everywhere, from living room to kitchen to toilet and bedrooms. A different floor was chosen for the bathroom only.
