

Yavorska Studio Dental Clinic

For the Yavorska Studio Dental Clinic, the Floorbest team selected and installed flooring in accordance with the healthcare facility requirements and the interior design concept. The project was carried out in collaboration with AM_GROUP and Dental Project. Sphera Element homogeneous vinyl flooring was installed in the treatment rooms, ensuring hygiene, durability, and ease of maintenance. Flotex carpet tiles were selected for the waiting area and the director's office, enhancing acoustic comfort and adding warmth to the space. The result is a modern, functional clinic where high-quality materials harmoniously complement the design and create a comfortable environment for both patients and staff.
