

Calais Hospital

For the construction of Calais Hospital in 2013, the flooring choice fell on Eternal, Trafic compact and Suresstep ranges of Forbo Flooring Systems because they connect estheticism, design, functionality, sustainability, comfort and hygiene. The PVC acoustic solution with a reinforced double wear layer has seduced the project manager; indeed, it is available to accordance with hospital universe, subject of batteries and diseases transmission factors. Moreover, this PVC coverage allows an easy maintenance of flooring, a rapid changing and an unbeatable comfort in term of runnability, the everyday basis of the hospital staff.

So, 80% of hospital flooring coverage (surgery rooms, passages, bedrooms and 450 bathrooms) is Forbo Flooring. The Calais Hospital has privileged the creation of a cozy universe like in hotels or leisure spaces. In this way, the ambiance is jovial and calming for the patients, the hospital staff and the visitors.
