

Cholet Hospital

Cholet Hospital has proceeded to its biggest extension since its creation in 1977. With transparencies and flashy colors outside and inside, the spirit of place is more closely reminiscent of hostel atmosphere than hospital function. This is the reason why the architect has been attracted by the chromatic palette of the "Chromatech" range and by the proposals strength of Forbo in order to adapt to its project with a special production. Technical side, it is especially the compromise acoustic/indentation which has interested them, as much as the stain-resistant tests "overclean".

Project name	Hopital de Cholet
Commissioned by	PFPE
Architect	AIA Associes
Photographer	© Frederic Baron
Date of completion	2014
