

Tessera Carpet tiles from Forbo Flooring Systems have been used as part of a pilot scheme by Lloyds TSB within one of their Scottish Widows buildings to improve their employees' experience at work. The project "New Ways of Working" involved trials at the company's office in Edinburgh with Alignment carpet tiles from the Tessera collection featured as the chosen flooring. More than 2000m<sup>2</sup> of Alignment carpet tiles have been used in the administration area and call centre to create walkways in response to staff requests for wayfinding tools that will help them navigate around the building.
