

EON Reality

At the new European headquarters of EON Reality, a world leading interactive 3D software provider, a variety of Forbo floor coverings have been specified for a futuristic interior, designed to challenge and stimulate the senses.

The floor coverings used in this project are Eternal Slate 13562 black (design vinyl sheet) and Flotex Vision Linear Cord (flocked flooring). Eternal Slate 13562 is no longer in collection. The tabletop below shows a similar colour: Eternal Material charcoal slate.
