

Illustrative Passive House, Poland

"Illustrative Passive House", build from organic materials, is the home office and place of residence of architects from Studio "DOM ARCHITEKTÓW". As the architects say: "Construction had to implement all modern solutions in accordance with sustainable environmental development assumptions, from organic origin materials, therefore renewable and the most recyclable. The priority was to ensure a healthy (safe) environment of life and favorable microclimate. We focused on eco natural building materials and the maximum elimination chemicals." Forbo's Marmoleum Piano is perfect flooring for this project.
