

Ferdinand-Heye-Haus Düsseldorf

The Ferdinand-Heye-House is located in Düsseldorf Gerresheim. This is a house for people who need extra care or suffer from dementia. A nice combination of Allura Wood and Flotex Vision floors has been installed. The 80 million nylon 6.6 fibres per square metre in Flotex create a tough and durable floor, while the impervious cushioned backing ensures such a quiet and comfortable floor, that it is as if carpet has been installed. This makes Flotex the ideal product to create a homely atmosphere in the Ferdinand-Heye-House.
