

## Isala

From August 2013 Zwolle has the largest academic hospital in the Netherlands. With the construction of the Isala Clinics a healthcare facility has risen with an area of 110,000 square meters, nearly 900 beds and about 5,000 employees. And this is all located in an organic, colorful design that has been implemented in detail in exterior and interior. The core: a sustainably built "better house" in form, function and environment, promotes the recovery of patients. Forbo has contributed with nearly 90,000 square feet meters of flooring.
