

Krabbelstube und Kindertagesbetreuung Planet Filli Future

A large area containing everything a child could wish for, has been built at Fill's Headquarters in Gurten as part of the expansion program. They called it "Planet Filli Future". Started in summer 2016, professional child care offered for the first time here, for children up to the age of 12, with the aim of helping parents harmonize their work and family lives. With the Filli Future project, Fill Machine Engineering is once again demonstrating its willingness to innovate outside its core business as well – much to the delight of the constantly growing band of young Filli Future fans. The company provides this project "Fill your Family". A lot of benefits for inside employees and families to enhance the quality of life of the workforce.
