

Long Tall Sally

Trifle Creative selected Forbo Flooring Systems' luxury vinyl tile Allura Flex in white weathered oak for the new workspace of Long Tall Sally – the go-to label for the tall women of the world. This was thanks to its high Light Reflectance Value (LRV) ratings and ability to give the space a contemporary feel.

The high LRV ratings of the pale wood aesthetic from the Allura Flex range, installed by FLOOR_STORY, will allow additional light, from artificial or natural sources, to reflect off the floor and brighten the space efficiently. The more light a workspace experiences, the more employees will benefit from an improved and healthier working environment.

Location	London, UK
