

**memox.world Zürich**

The memox.world in Zürich is a workshop and event location completed in February 2017. On 400 m<sup>2</sup>, 5 areas show how adaptable and inspiring the working environment of tomorrow is. For each area a suitable floor has been installed, to create a stimulating environment that inspires networking or to create a quiet office space. The central element is the inspiration.floor, a large interaction area for team work, workshops, trainings, events and more. The applied Tessera carpet tiles offer a retreat for small meetings or undisturbed calls. The bistro area, which is equipped with Allura planks in wood design, offers a relaxing get-together or a coffee break.
