

National Association of Schoolmasters

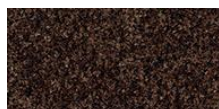

A range of products from the Forbo Flooring Systems integrated portfolio have been laid in the conference and seminar block at the Headquarters of the Association of NASUWT Teacher's Union in Birmingham. Coral brush activ entrance system, Westbond Natural, Marmoleum Vivace and Tessera Alignment were specified throughout the ground and first floors thanks to the natural qualities and appearance they have. The ability to source a range of products from one supplier was extremely appealing to both the architects and NASUWT, helping to reduce time and costs.

Location	Birmingham, United Kingdom
