

Outward Bound, Ullswater

Following the installation of ten outdoor educational pods and an extension to the residential blocks at their Ullswater centre, the Outward Bound Trust called upon Forbo Flooring Systems to come up with an integrated flooring solution that would withstand the high footfall the centre receives on a daily basis.

Forbo's Allura Safety, was installed in all of the pods as the tiles are a design led yet practical option for buildings that require a floor covering that is contemporary, flexible and delivers outstanding safety performance. For the adventure centre 's new accomodation Forbo's Flotex offered the perfect solution as, after getting wet it dries within a four-hour window– and Flotex is also the only textile flooring covering to be Allergy UK approved as, with the correct cleaning and maintenance regime, it won't harbour dust mites, contributing to a better indoor environment for all who use the facilities.
