

Paragon Arena

Paderborn FC recently undertook an overhaul of the VIP section of their 15,000 spectator capacity stadium, comprising of 2 VIP Rooms over 2 levels in which up to 730 special guests can be accommodated.

Over 800m² of Forbo's Allura luxury vinyl tiles were used exclusively through out the bar and restaurant areas to give a high design finish combined with the durability and ease of maintenance required by the Club. For the VIP bar area on the bottom level, a light pine design was chosen to work with the modern wood design of the tables, while a darker raw timber effect was chosen for the restaurant area on the upper level.
