

Radisson Blu Warsaw, Poland

Allergy rooms are the hottest hotel trend. Radisson Blu is one of the first hotels in Poland who offers such accommodation for allergy sufferers.

One of the most important thing in the allergy room is an appropriate floor.

Forbo offers a unique solution: Flotex flocked flooring. Flotex is approved by Allergy UK as it has proven to have a positive impact on the lives of allergy sufferers. It has the ability to trap allergens and then safely release them to standard cleaning appliances. When cleaned, Flotex releases twice as many allergens compared to the cleaning of conventional carpets. More harmful allergens are removed, creating a more comfortable environment for asthma and allergy sufferers.
