

Sundbyøster Skole

Sundbyøster Skole is a new institution in Copenhagen, built at the depot where the trams once were housed. This history is pivotal in the design of Mangor & Nagel Arkitekter.

"Taking the colors of the tram; yellow, blue, green and red as its starting point this color programme occurred based on Forbo Furniture Linoleum Collection. The beautiful palet of soften tones are well connected. Besides the pupil can recognise her own colour" Sabine Kjærulff, Architect MAA, Mangor & Nagel A/S
