

ACCESSIBILITY ACCESSORIES

Tactile tiles and strips

► IMPORTANT

- Quick and easy installation: adhesive.
- Remarkable resistance to abrasion and heavy traffic.
- No breakage or premature wear: high-quality material.
- Enhanced safety thanks to improved visual contrast with the floor (choice of colors).
- Complies with standard NF P98-352.
- Non-slip.

Self-adhesive tactile tiles

The warning strip or tactile tile is positioned before a risk area (stairs, void) to alert anyone of the danger of falling. Its 3D geometry allows the danger to be detected by the foot. It is mechanically fixed.

Box of 4 tiles of 1350 mm x 400 mm

3170ADH - Blanc

3171ADH - Gris

3178ADH - Noir

3176ADH - Jaune

3173ADH - Rouge

3177ADH - Marron

Self-adhesive tactile strips

The orientation aid strip must contrast visually with the floor to facilitate guidance for visually impaired people and have a continuous tactile marker along its length to enable guidance with a cane.

They have two functions to enable users to locate themselves and to choose a route.

Box of 15 strips of 1000 mm x 215 mm

3071ADH - Gris

3076ADH - Jaune

3073ADH - Rouge

Tactile studs to be slot

The studs are positioned before and parallel to a risk area (stairs, gaps, dangerous crossing) to alert anyone approaching the danger of falling. Their 3D geometry allows danger to be detected by the foot.

- Resistant to heavy traffic.
- Exceptional strength thanks to anchoring in the ground.
- Enhanced prevention thanks to improved visual contrast with the floor.

Kit of 200 studs with installation template included

3679 - Inox
