## BELTS FOR HARSH, ABRASIVE CONDITIONS

Transtex Belting polyurethane is your front line against harsh, abrasive materials that can destroy your conveyor belts. Whether conveying recycled products, metal, wood, foundry products, food or chemicals, with forbo transtex Polyurethane belts you can handle the rough stuff.

Features	Benefits
Polyurethane cover	<ul style="list-style-type: none"> <li>Resistant to oils, chemicals, abrasion, cutting, gouging</li> </ul>
Friction bottom cover	<ul style="list-style-type: none"> <li>Affords low coefficient of friction for slider beds</li> <li>Able to hot weld v-guides to bottom</li> </ul>
White and clear covers	<ul style="list-style-type: none"> <li>Meets food grade standards, all ingredients are FDA approved</li> </ul>
2mm red covers	<ul style="list-style-type: none"> <li>Able to handle those tough cutting and gouging applications</li> </ul>
Covers available in 85 and 90 Shore A durometer	<ul style="list-style-type: none"> <li>Maximum resistance to abrasion, cutting, and impingement</li> </ul>
Covers available in 1mm-2mm	
Interwoven or plied construction	<ul style="list-style-type: none"> <li>Ability to custom design a carcass made to address specific application problems, such as, cutting and gouging, tracking, vulcanizing alternatives and smaller pulleys</li> </ul>
Thermoplastic fabrication and joining	<ul style="list-style-type: none"> <li>Whether interwoven or plied, thermoplastic fabrication and joining will yield high tension and a smooth surface</li> </ul>

### Polyurethane Conveyor Applications

- Transfer Conveyors
- General Conveyors
- In Feed Belt
- Discharging Belt
- Metering
- Stamping
