

PRODUCT INFORMATION

Tufted textile floor covering in tiles

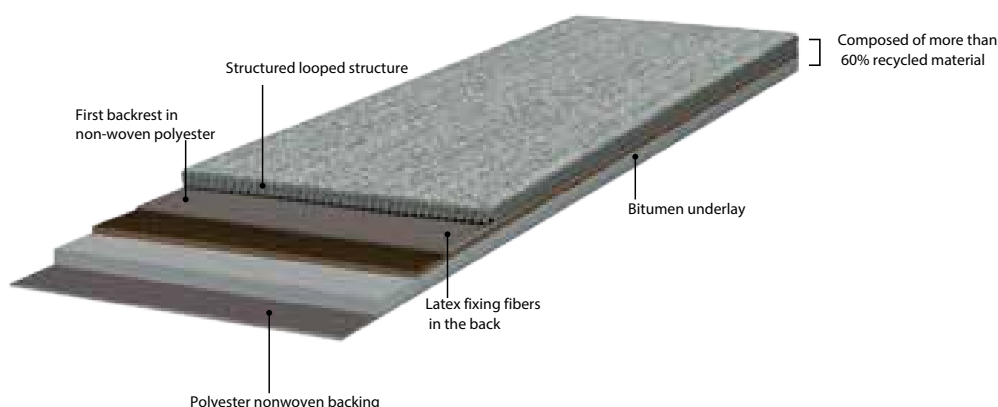

Supply of a structured looped tufted textile floor covering, made of 100% polyamide 6 fibers and mass-dyed, in 50 x 50 cm leaded tiles, of the Tessera cloudscape type.

It combines a very good resistance to traffic (number of tufts of 217,267/m² (+ 10% / - 7.5%) and an acoustic efficiency to impact noise declared $\Delta L_w = 26$ dB. Its mass tinted fibers will confer a better behaviour in time.

It will be antistatic office and adapted for dissipative installation.

At the end of its life, Tessera cloudscape will be 100% recoverable.

It will benefit from a 10-year warranty and can be extended up to 6 additional years (depending on the conditions of use of the manufacturer's Coral or Nuway cleaning mats).

Technical specifications

Commercial name	Tessera cloudscape
Total thickness	7,2 mm (± 10 %)
Total weight	4 180 g/m² (± 10 %)
Impact sound reduction	$\Delta L_w = 26$ dB
Sound absorption	$\alpha_w = 0,20$
Reaction to fire	B_{fl,s1}* - n°25/08527J/01/18 (BTTG)

Environmental datasheet

- FDES compliant with NF EN ISO 14025, NF EN 15804+A1 and its national complement NF EN 15804/CN and available on INIES.
- TVOC emission rate < 100 µg/m³, class A
- Meets HQE, LEED and BREEAM standards
- BRE and GUT certified
- Product free of any substance subject to restriction (formaldehyde, pentachlorophenol, heavy metals, CMR 1A and 1B); complies with European REACH regulation
- More than 60% of the total weight of the product is made of recycled materials.
- Designed and manufactured with guaranteed 100% renewable electricity
